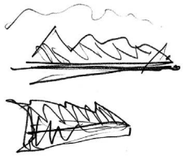
Information center at the Rijksmuseum



Amsterdam, Netherlands

Publication´s title:	**Information Center at the Rijksmuseum, Amsterdam**
Typology:	**Education and Culture, Landscape**
Client:	Programmadirectie Het Nieuwe Rijksmuseum
Surface:	155 m²
Year:	2003
Status:	Demolished

REPORT

The Infocenter Pavilion was initially intended to provide information on the new Rijksmuseum project. In the meantime, it has been occupied by a variety of activities, both planned and spontaneous.

The architecture of the Pavilion refers to the colossal Rijksmuseum located just behind. The sloping roof and angled rear façade, with windows that frame fragments of the Rijksmuseum, refer to the roofing of the main building, while the transparent main facade seeks connection with pedestrians and the public space.

The furniture is elegantly situated and reinforces the length of the building. At the sites where the rear facade creates spaces, there are some round elements- a counter and a pedestal for the large model of the project- which lie isolated in the space.

01 Tubo de drenaje
02 Relleno de gravas
03 Viga de hormigón armado 700x350 mm (cimentación junto con pilotes de acero Ø250 mm)
04 Aislamiento de células cerradas e=50 mm
05 Lamina impermeabilizante
06 Perfil de acero L 100.50.6
07 Vierteaguas de madera
08 Carpintería corredera de madera maciza
09 Aislamiento térmico e=32 mm
10 Difusor
11 Plenum. Espacio para conducción de aire
12 Pavimento de madera maciza de roble e=20 mm
13 Tableros de madera contrachapada e=18+18 mm
14 Tablero de madera contrachapada e=18 mm
15 Solera de hormigón armado e=200 mm
16 Aislamiento de células cerradas e=60 mm
17 Rastreles de madera de 32x32 mm
18 Plinto de aluminio
19 Piera de madera maciza de 146x100 mm
20 Paneles de yeso laminado de e=15 mm atornillados directamente a montantes estructurales de madera
21 Barrera de vapor
22 Montantes estructurales de madera de 146x70 mm cada 600 mm
23 Aislamiento de lana mineral e=146 mm
24 Membrana de estanqueidad
25 Cámara ventilada e=20 mm
26 Revestimiento de madera de cedro laminada e=24 mm (pintada en RAL 9010 las tablas horizontales/ RAL 7015 las tablas verticales)
27 Premarco de madera
28 Marco de madera maciza de siroco pintado en RAL 9010
29 Vierteaguas de chapa de aluminio
30 Vidrio con cámara 5+10+6 mm
31 Tablero contrachapado de madera e=25 mm
32 Chapa de zinc con goterón
33 Estor
34 Hoja corredera de vidrio con cámara 6+6+14+5 (total 32 mm)
35 Tablero de madera e=20 mm pintado en RAL 7015
36 Premarco de madera de 67x139 mm
37 Perfiles angulares de acero
38 Viga de madera
39 Proyector
40 Paneles de madera laminada e=18 mm
41 Barrera de vapor
42 Aislamiento térmico
43 Guía para iluminación
44 Cubierta de zinc e=5 mm
45 Rastreles de madera en bruto e=25 mm (juntas cada 600 mm)
46 Cámara ventilada e=25 mm
47 Paneles de madera laminada e=20 mm
48 Aislamiento térmico e=246 mm
49 Vigas de madera de 71x246 mm cada 600 mm
50 Techo acústico e=13 mm sobre rastreles de madera pintado en RAL 9010
